What will you need?

Hi! my name is Armando, and I'll be with you while you assemble this cabinet.

A flat, smooth surface. You can use the cardboard of the box or a rug.

An electric screwdriver isn't necessary, but it can make the work much easier :)

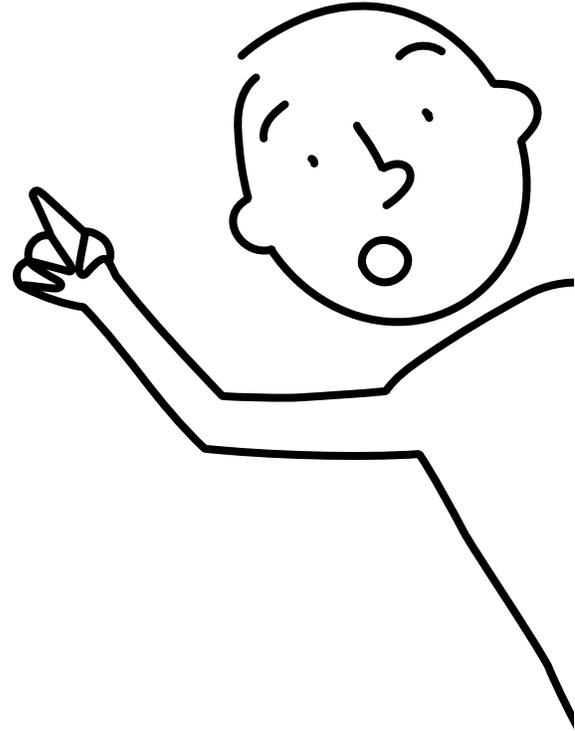

Where should you start?

This is so IMPORTANT!

Over the next few pages is the panel and hardware content for this cabinet.

Please make sure that the quantity of each one is correct, and that everything is in good shape.

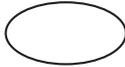

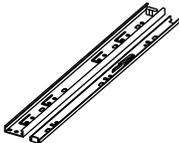

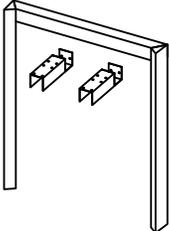

(When the cabinet is already assembled there's no warranty for this)

Panel quantity

A - x1	B - x1	C - x1	D - x1
E - x1	F - x2	G - x2	H - x2
I - x2	J - x2	K - x2	

What's in the hardware bag?

			
Wood dowel x47	Spreading bolt x50	Minifix cam x50	Cover caps x50
			
Glue x2	Flat head screw x12	Drywall screw x3	Slides + screws x2
			
Steel Leg x1	Nail-on glide x4		

Be careful!, try not to lose anything from this bag, its content it's necessary for assembling you cabinet.

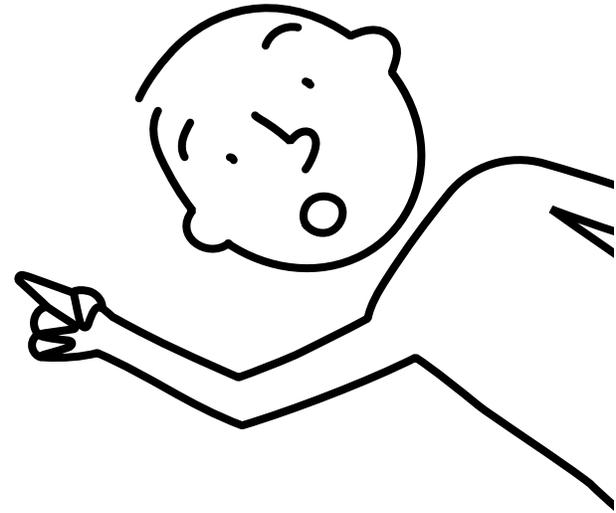

In case something is missing, please call to our customer service line:

1-888-391-01-66

How do the dowels and Minifix system work?

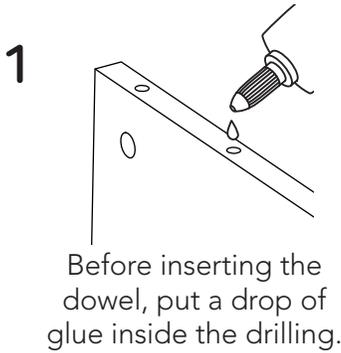

this is so important too!

Everytime you're using one of these connectors during the assembly, you should follow these same steps.

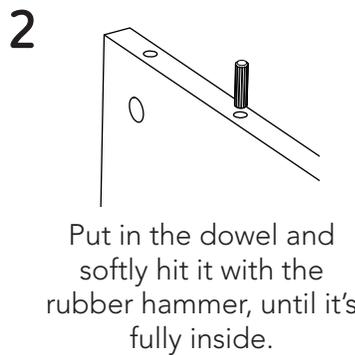

Wood dowels

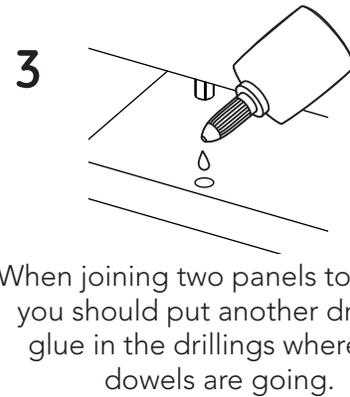

They are little wooden cylinders.

Before inserting the dowel, put a drop of glue inside the drilling.

Put in the dowel and softly hit it with the rubber hammer, until it's fully inside.

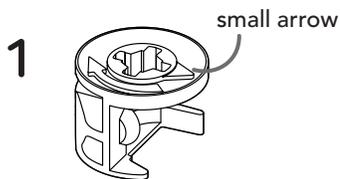

When joining two panels together, you should put another drop of glue in the drillings where the dowels are going.

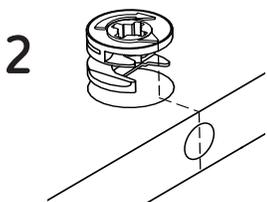

Don't forget to gently hit the panels to adjust the joint.

Minifix system

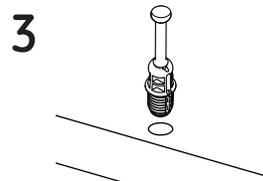

It's a joint compound of two parts: a spreading bolt and a Minifix cam.

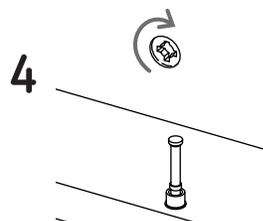

This is a Minifix cam. It has a little arrow on its upper surface.

You should insert these cams with the little arrow pointing towards the drilling on the panel's edge (shown on the left).

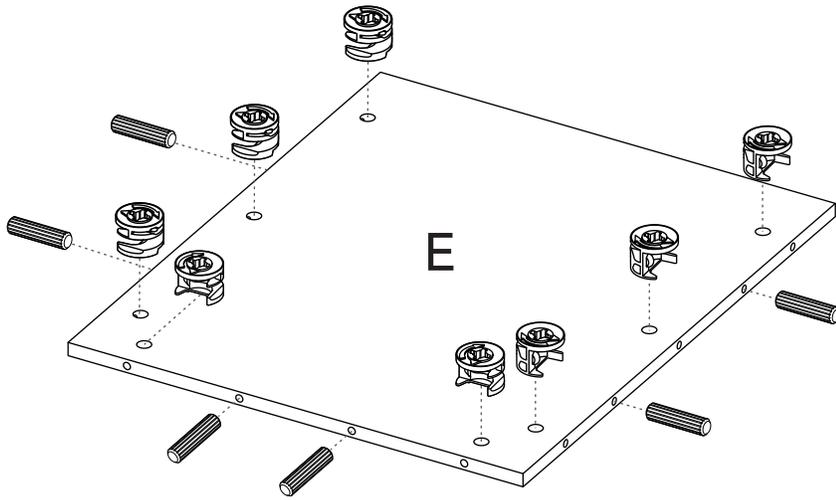

This is a spreading bolt. You should put it with the black plastic part facing down.

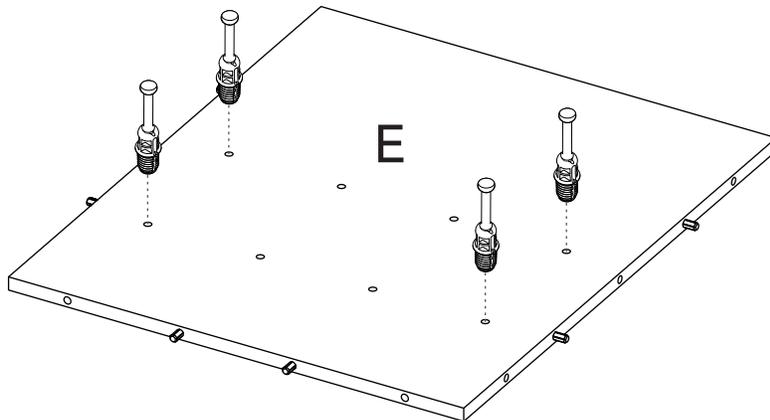

After joining two panels together you should turn the cams 180° with a phillips head screwdriver to adjust and secure the joint.

1 Let's start assembling!

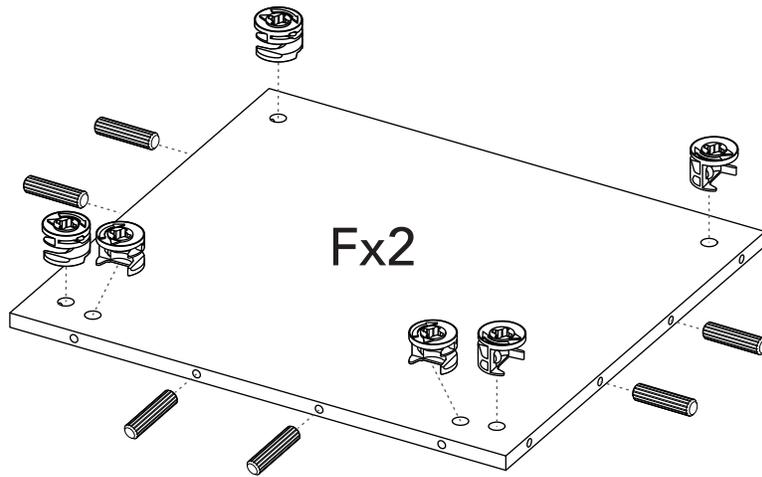

You can see the last page of this manual to have a full look of the panels of this cabinet.

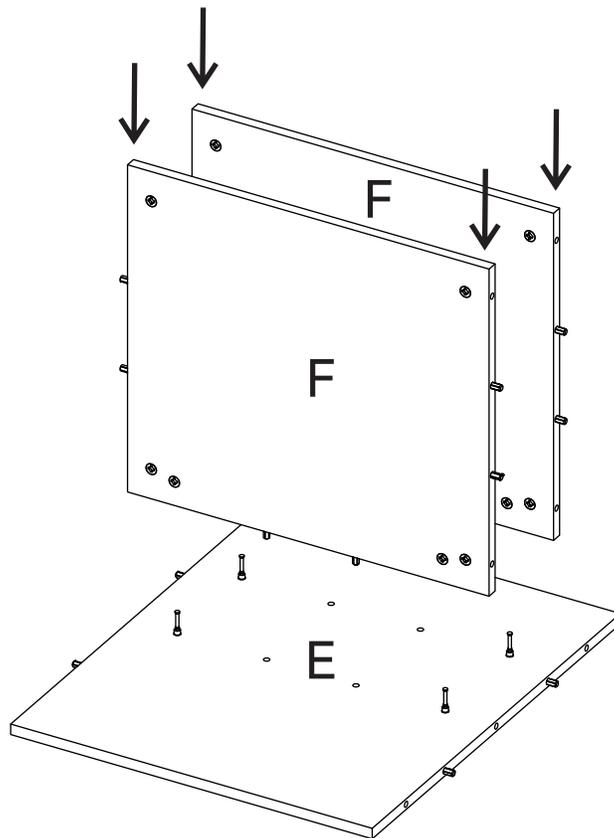

Turn this panel over

2

3

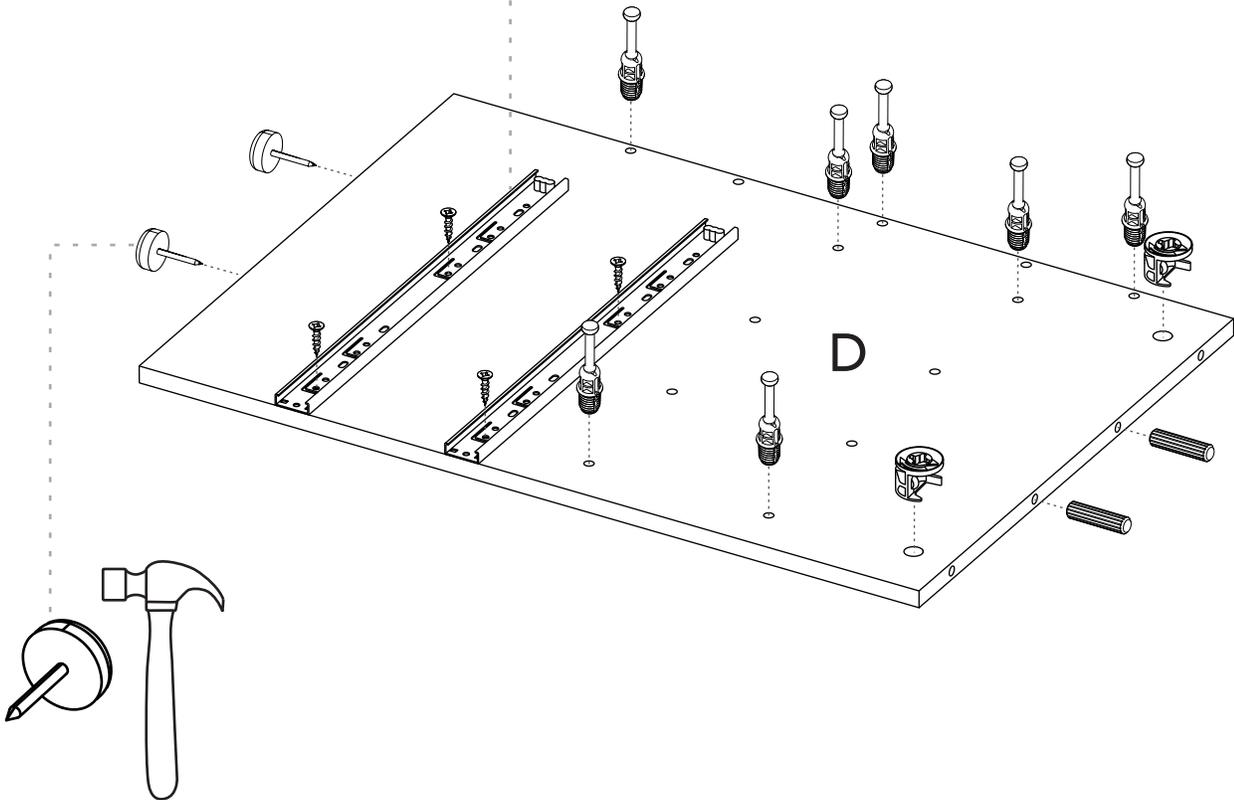

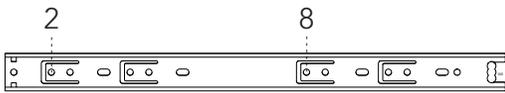

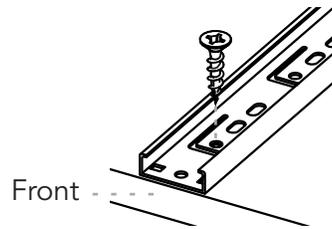

4

Drawer slides installation (apply for steps 4 and 5)

To begin, you must take out the smaller part of the slide, pushing down the black plastic part shown below:

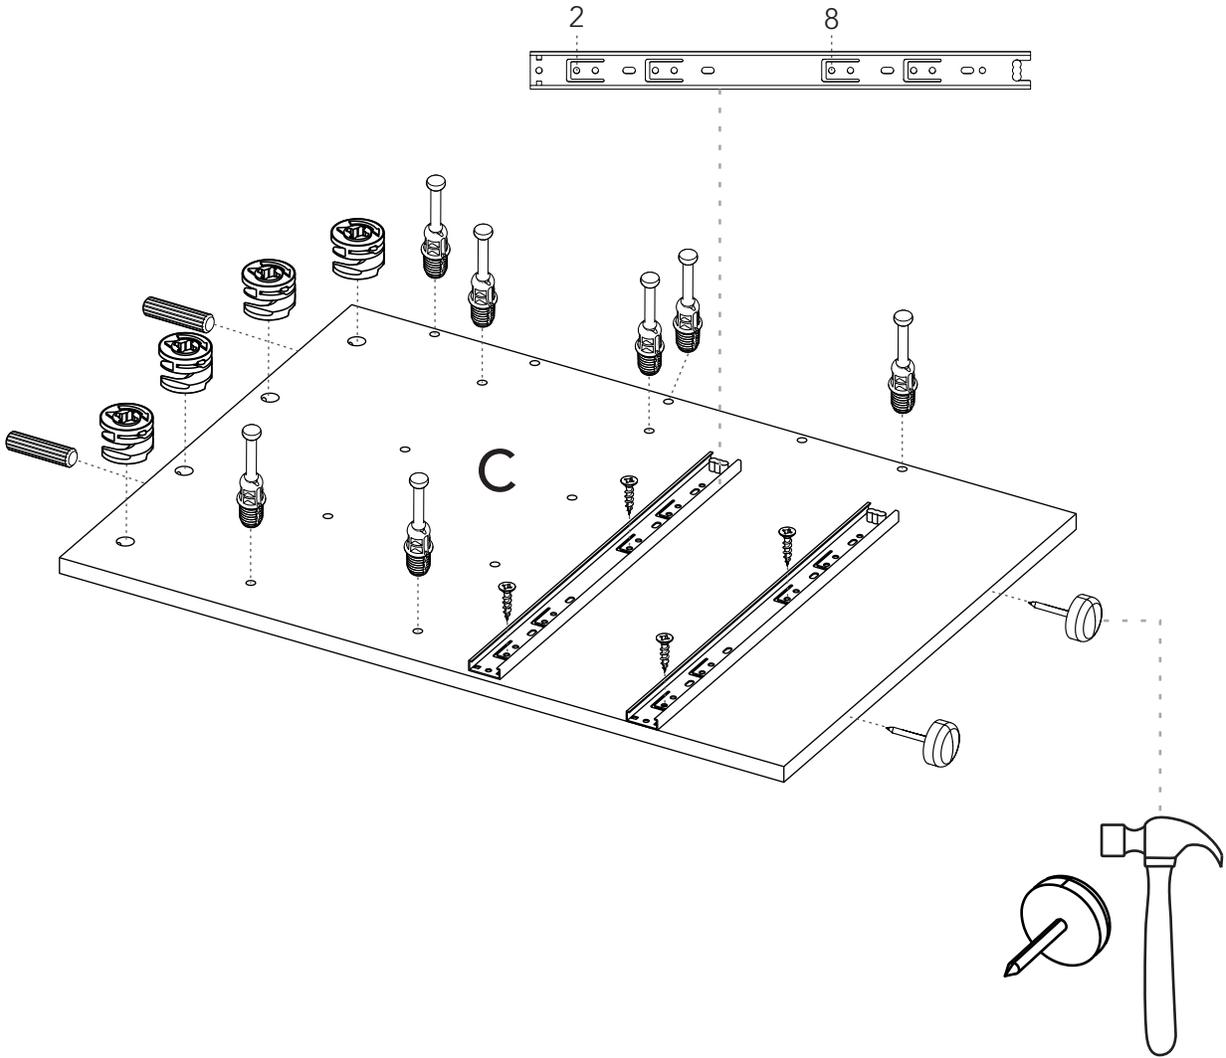

Take the bigger part of the slide and place it over the panel. The plastic stop should go towards the back.

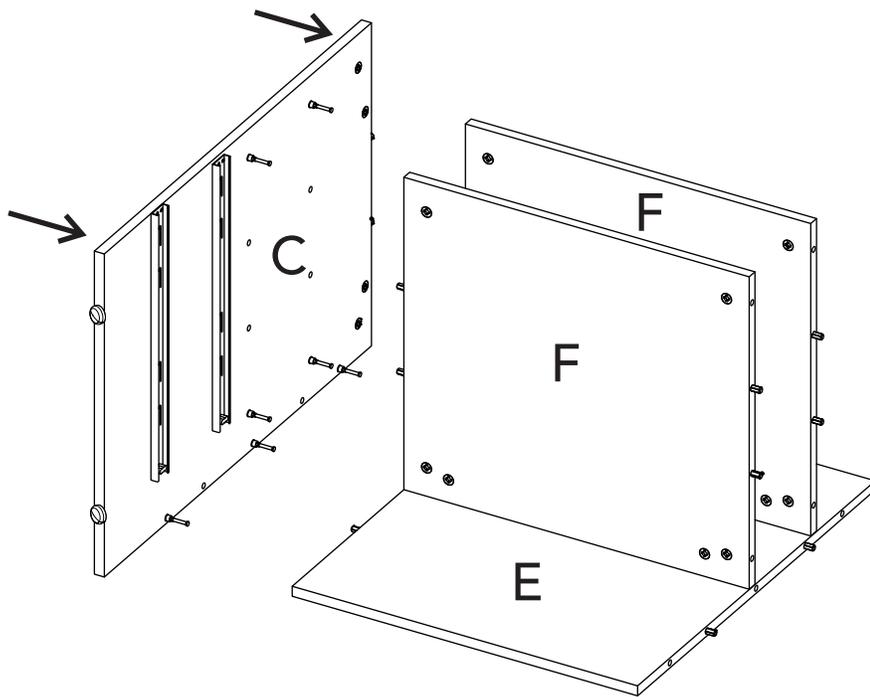

5

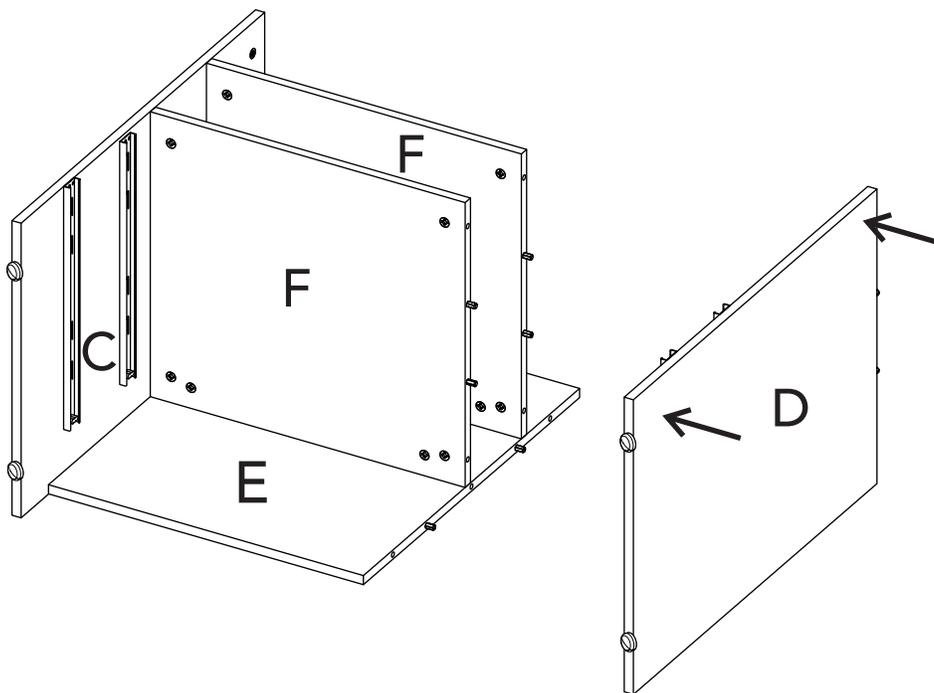

If you want to recall how to install this part of the slides, go to the 4th step again.

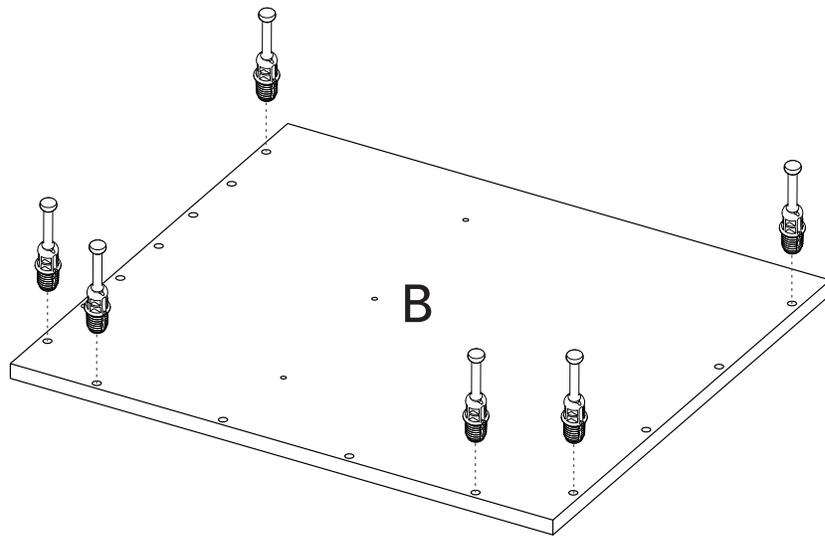

6

7

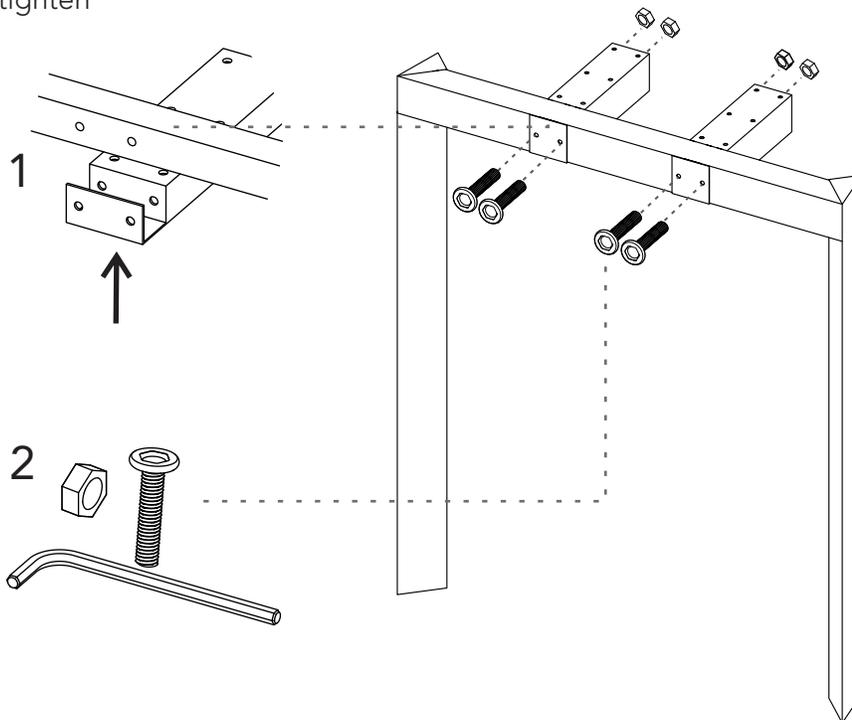

8

9

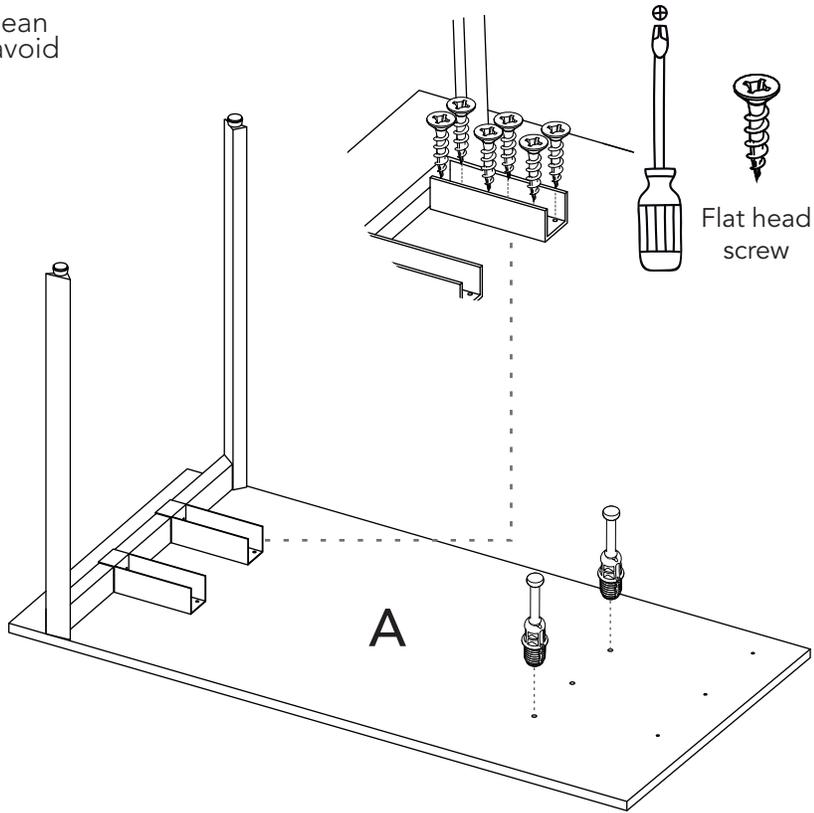

Leg installation

Insert the screws into the metallic structure to tighten the leg supports.

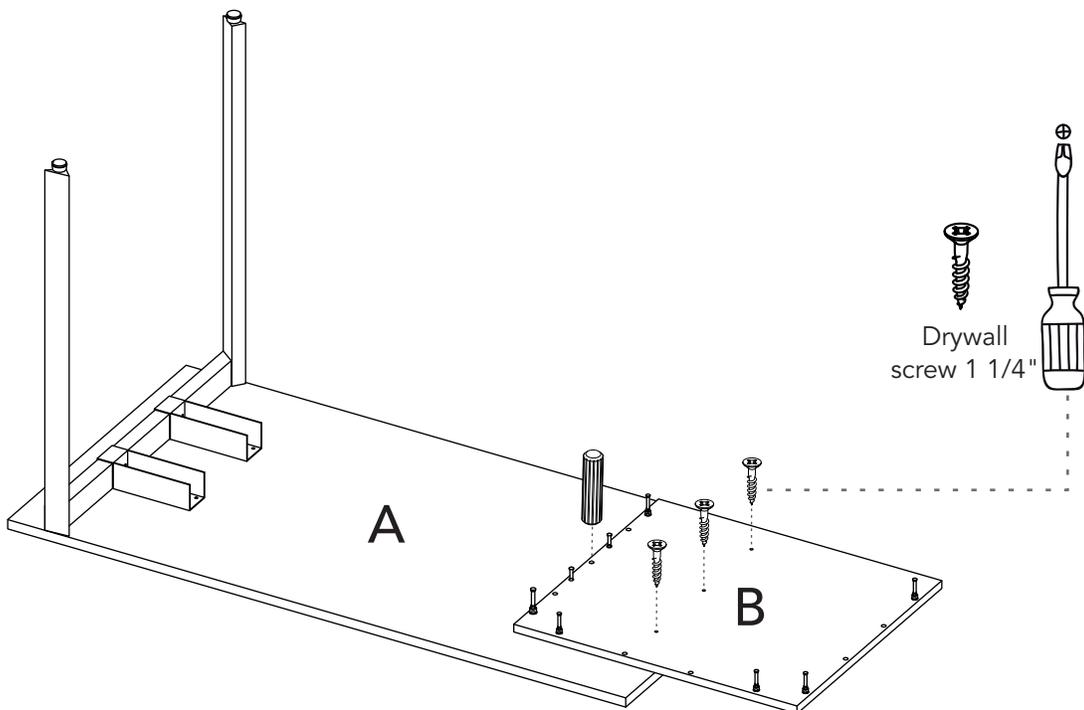

10

Place the table on a clean surface or blanket to avoid scratches.

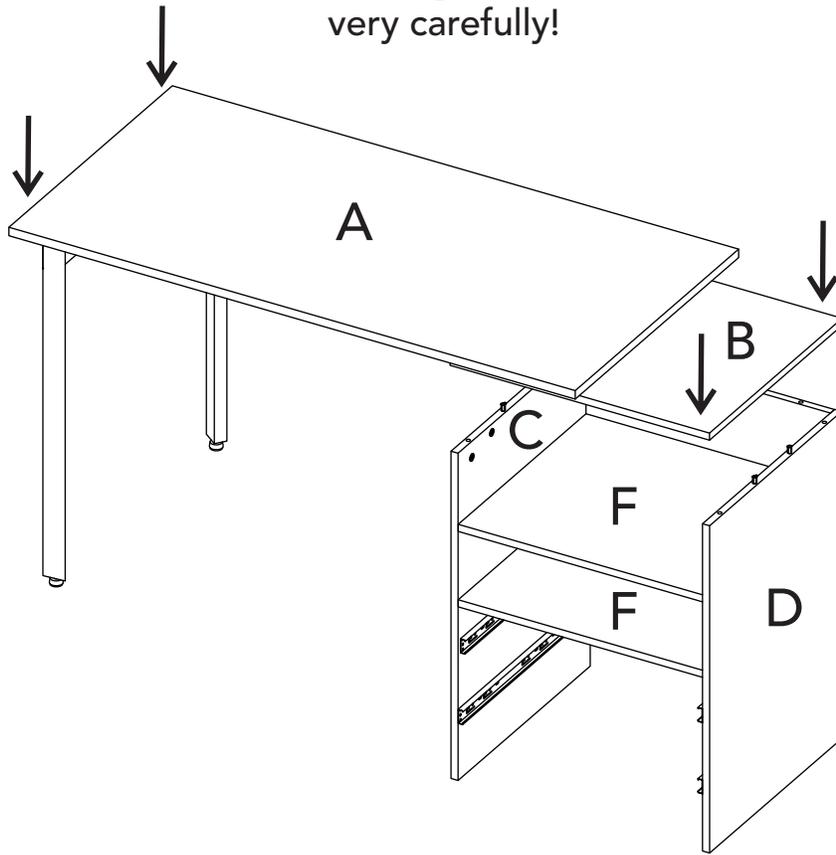

11

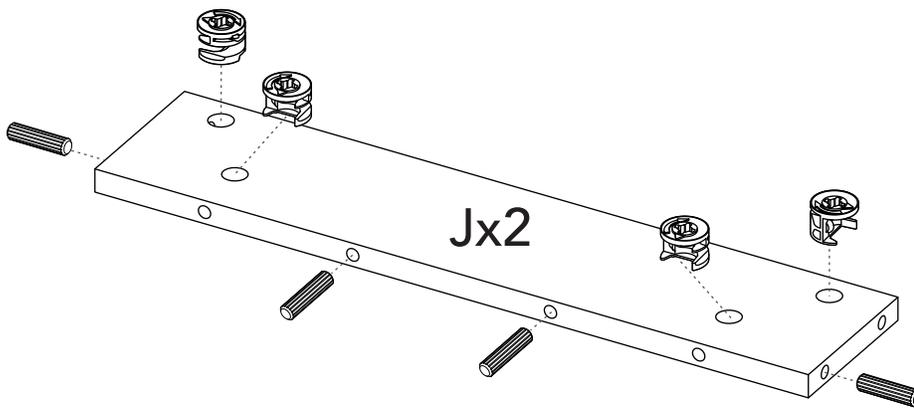

12

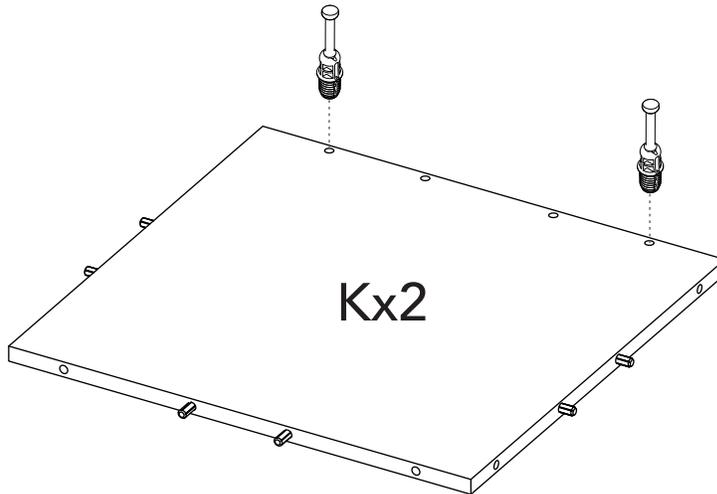

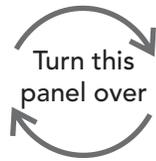

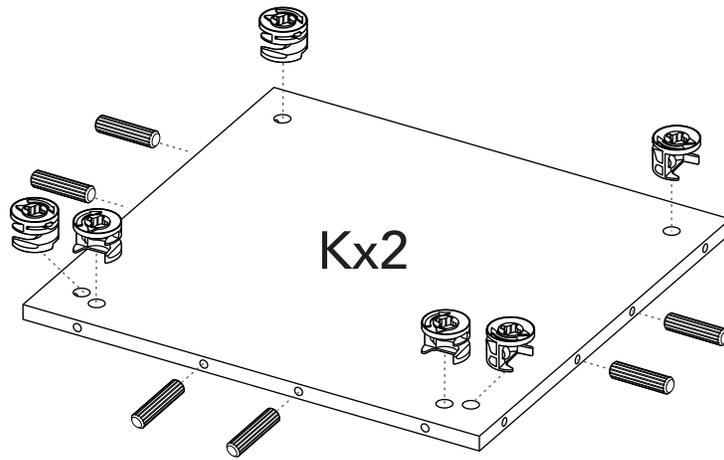

Turn over
the cabinet
between two
people

very carefully!

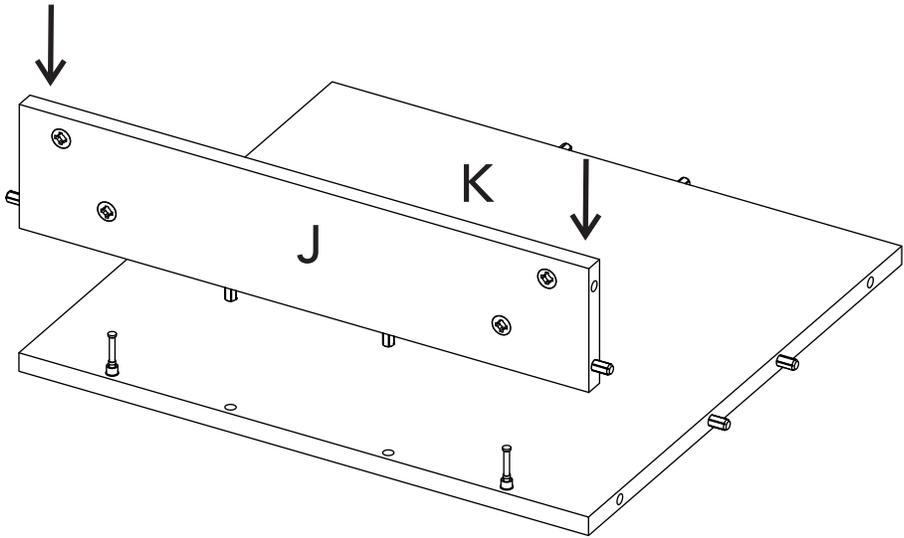

13

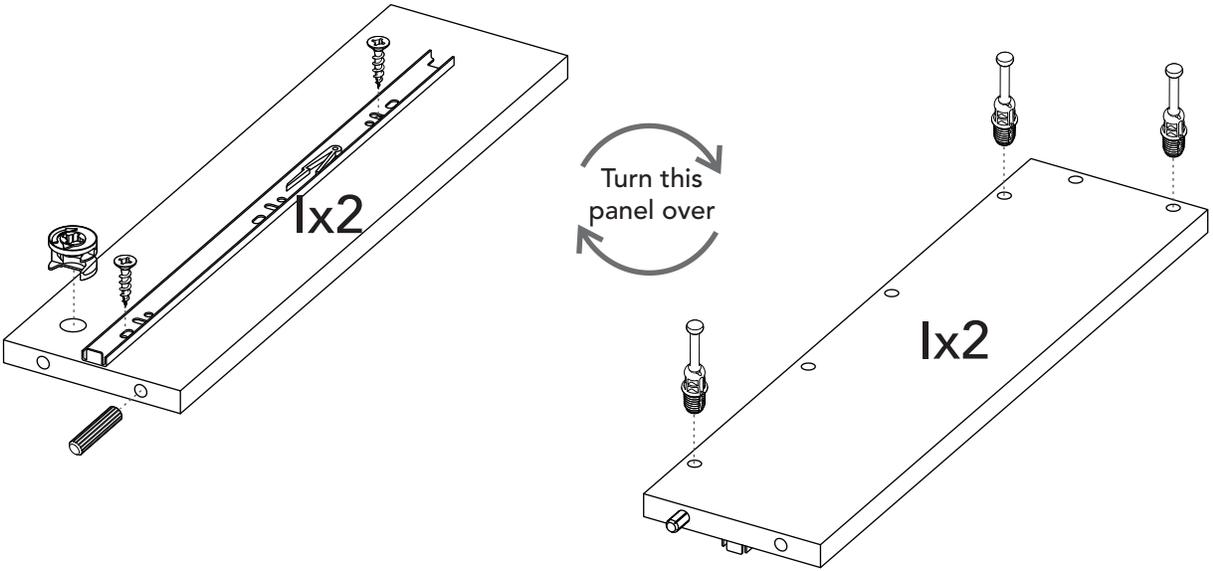

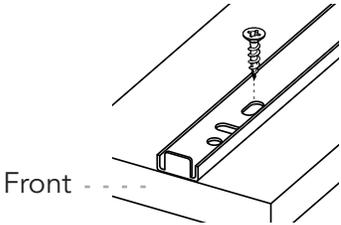

15x2

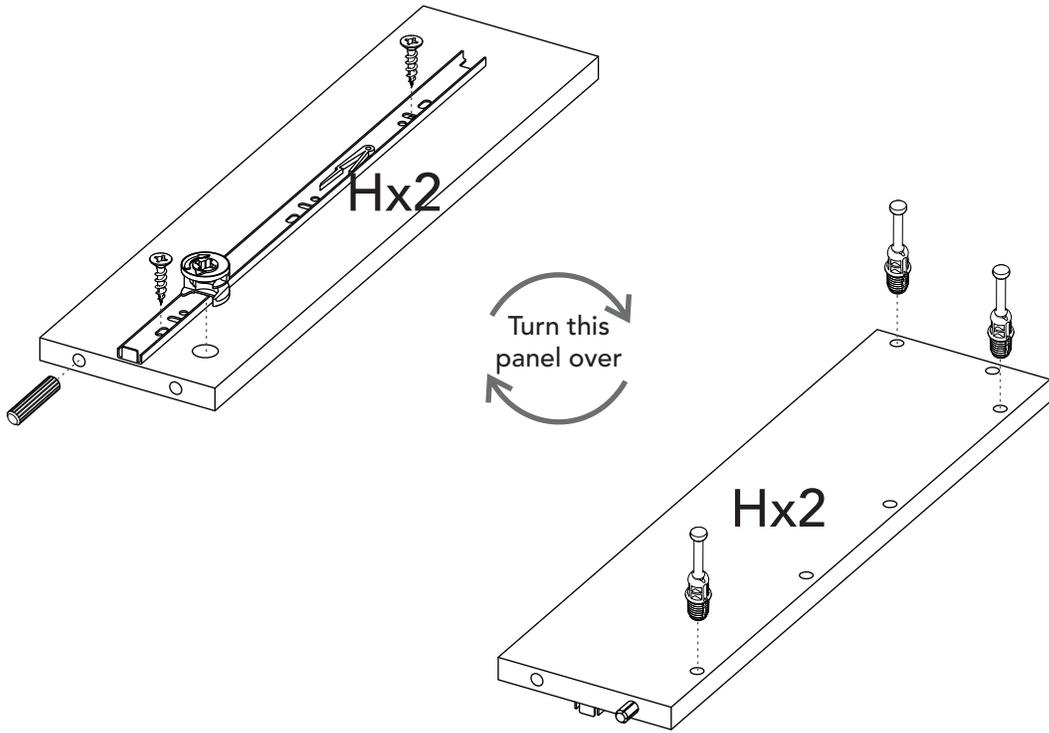

16

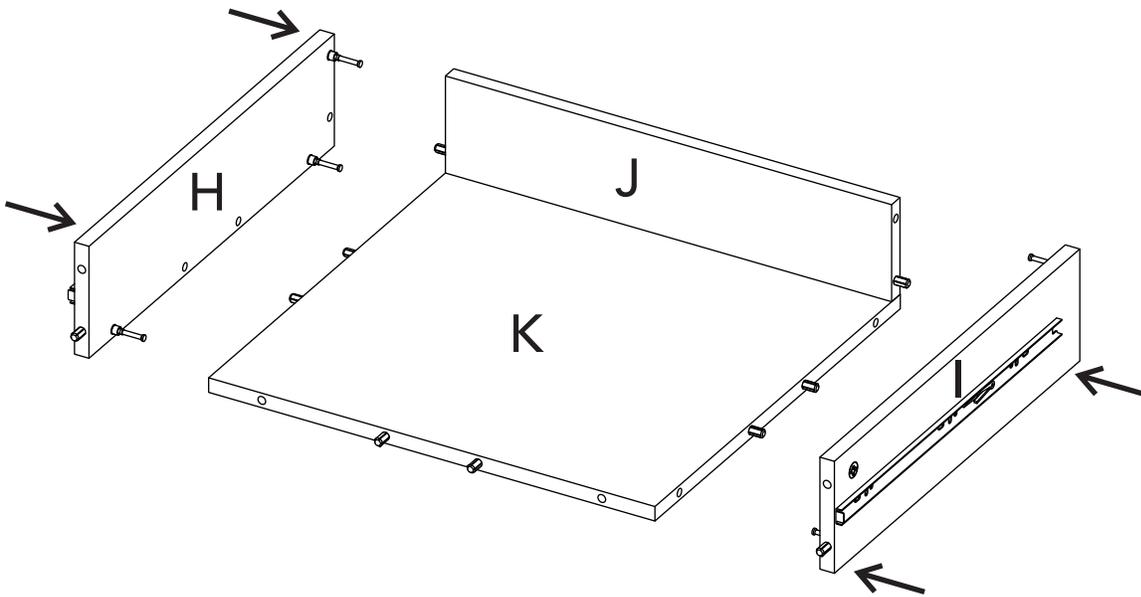

Take the smaller part of the slide and place it over the panel. The metallic stop should go at the front.

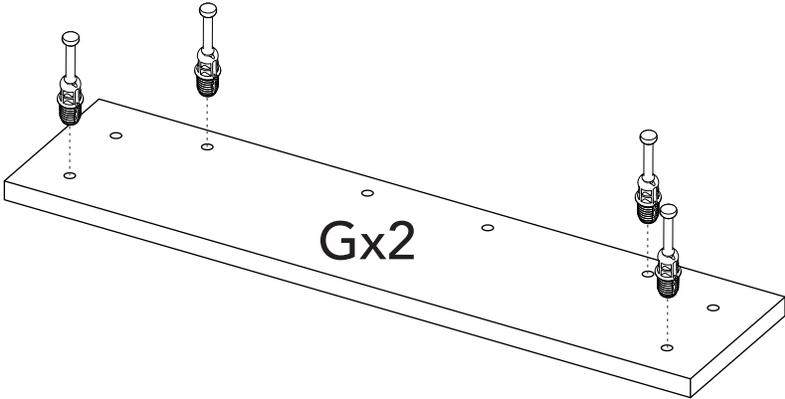

17

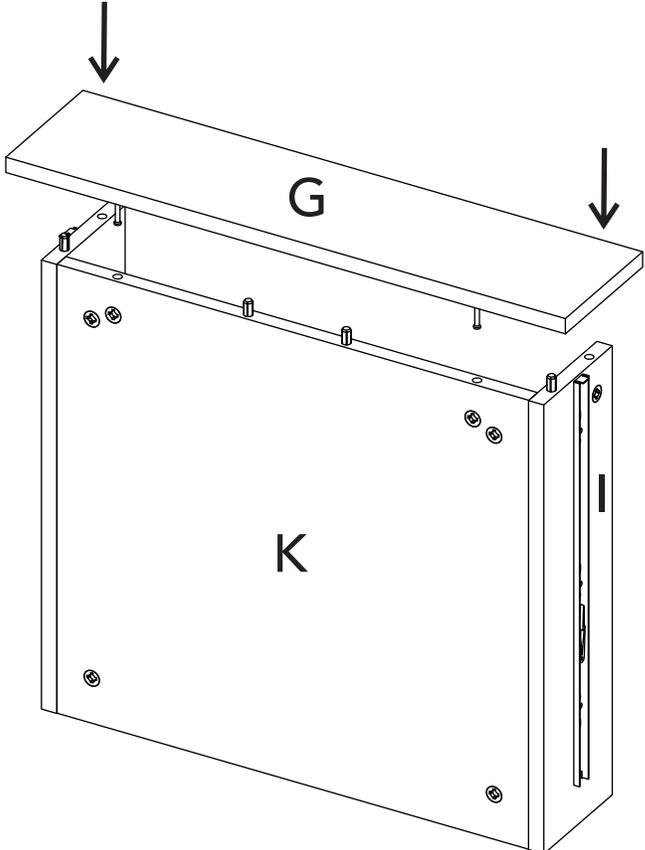

18x2

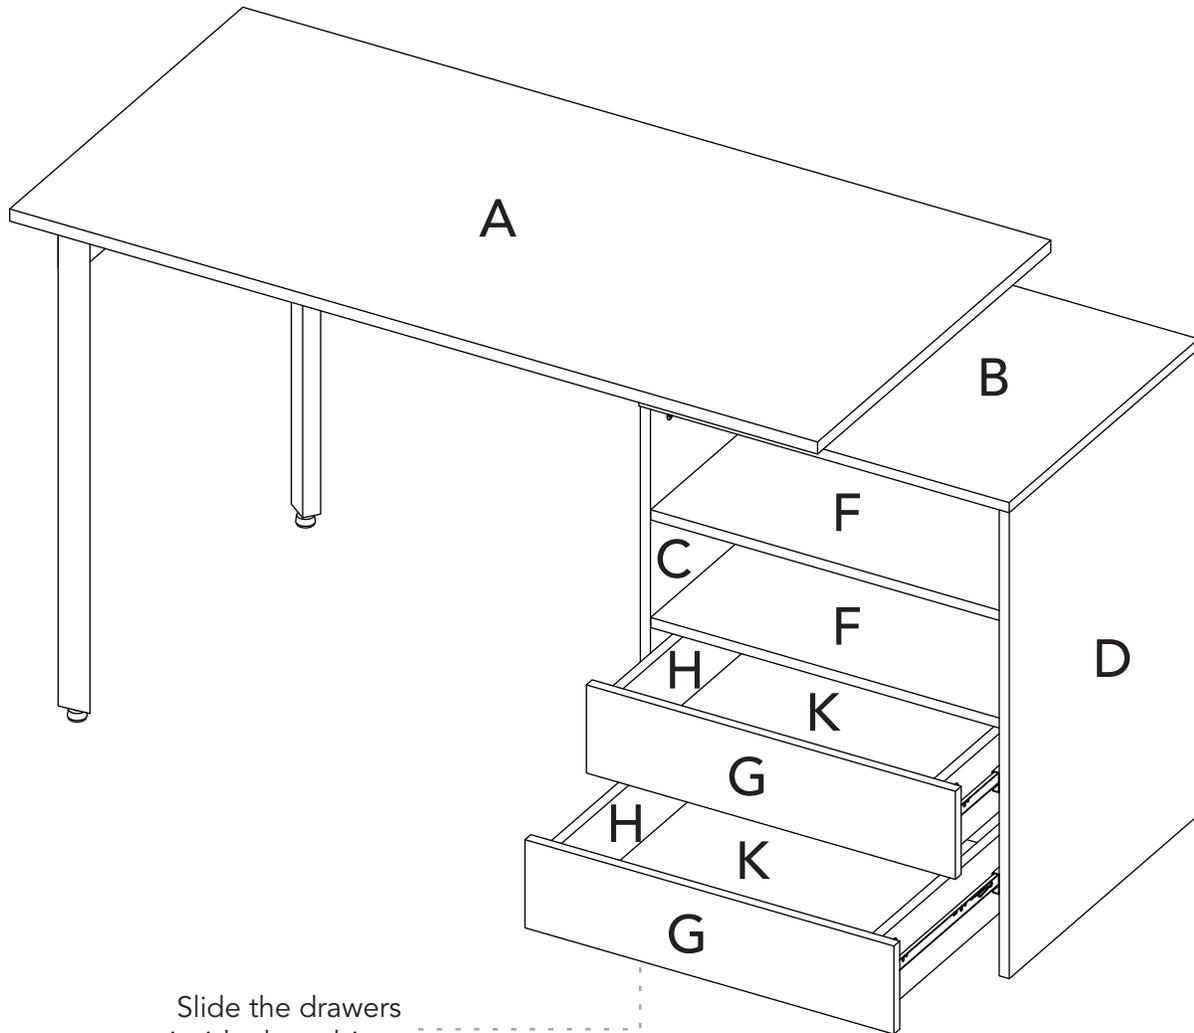

19

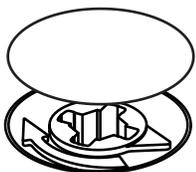

20x2

Slide the drawers
inside the cabinet.

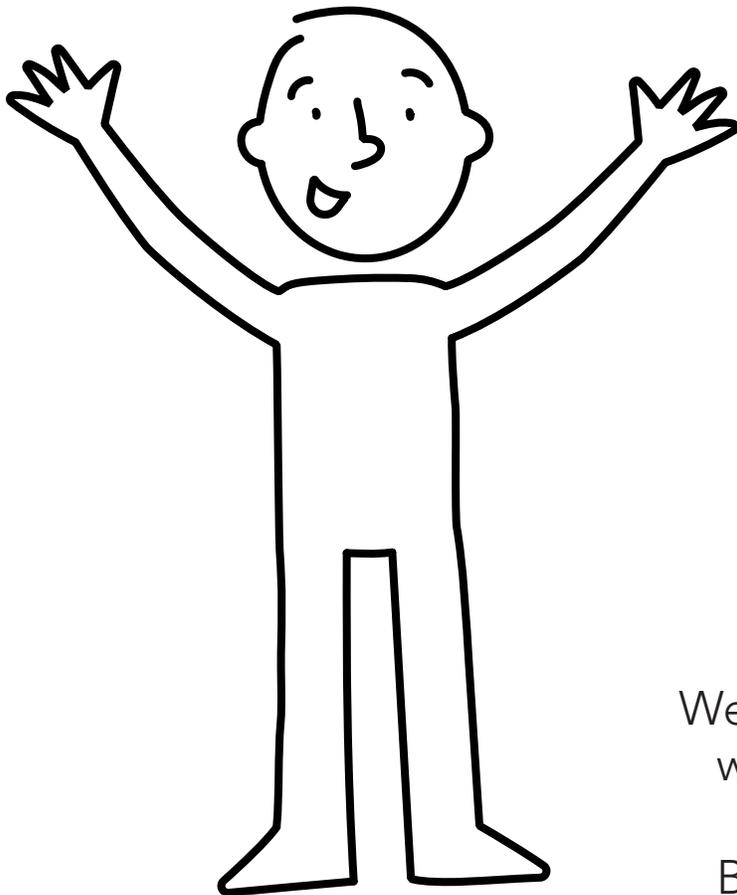

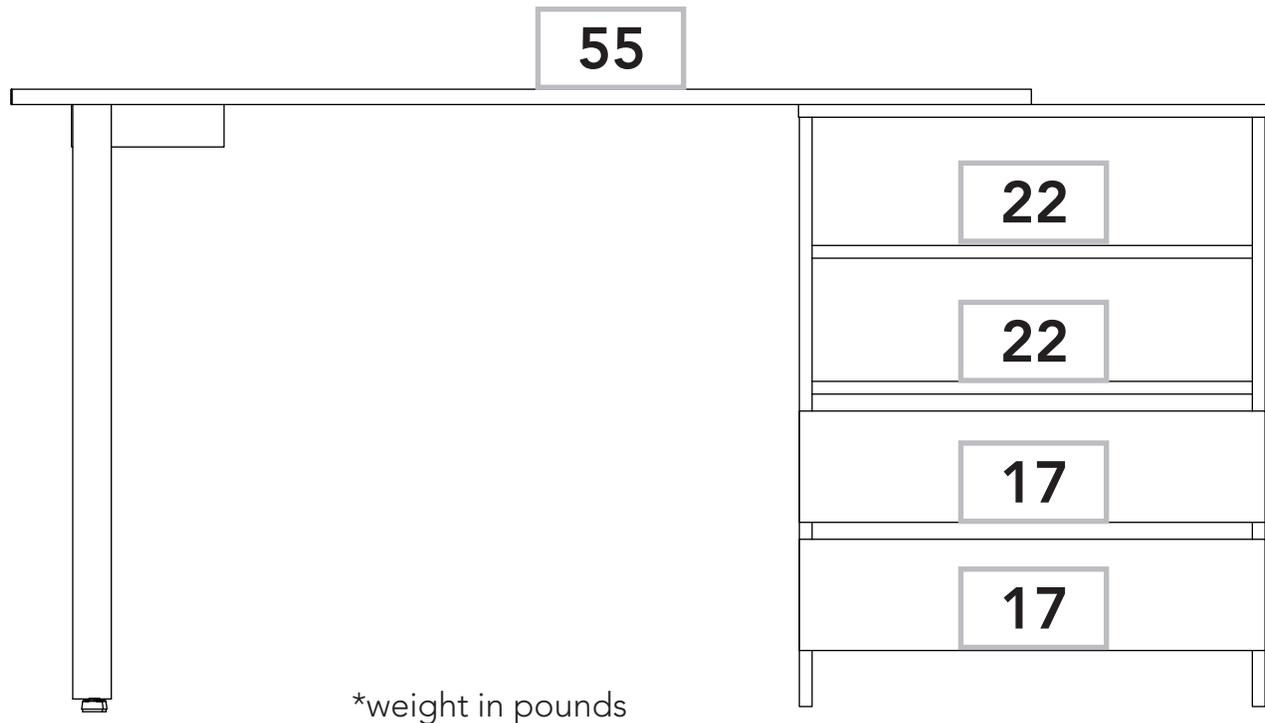

After adjusting all the
Minifix cams, cover
them up with the cover
caps.

After finishing the
assembly, lift off all the
adhesive letters.

How much weight does my cabinet resist?

**Congratulations!
It's done**

But don't go yet!

There are some recommendations left for you to take care of your cabinet correctly from now on.

SUPER IMPORTANT!

We suggest fixing the cabinet to the wall, so we can avoid the cabinet tipping and harming anyone. Be specially careful with the kids.

Taking care of your cabinet:

- Do not paint the cabinet.
- The cabinet is exclusively for indoor spaces. Do not expose it to the direct sun.
- Clean the metallic hardware with a dry cloth.
- DO NOT overload the cabinet (see suggested loads)
- Do not hit or hammer the cabinet (only when indicated here).
- Clean it with thinner, a soft soap solution or simply a damp cloth.
- Don't drag the cabinet, lift it up with other people.
- Avoid direct contact with water, fire or exposing it to high heat.
