**Customer Attention:**

To align doors and control gap in between doors. Product doors may need adjusting during and after assembly. This can be done by adjusting appropriate screws. See below illustration.

**Vertical Door Adjustment:**

Loosen both screws on all hinges and lift the door to the desired height. This allows an even space at the top and bottom between the door and frame.

**Lateral Door Adjustment:**

If door is hinge bound, (rubbing on frame as you close or open door) loosening screw shown and move the door in appropriate direction. (In or out)

**Horizontal Door Adjustment:**

Rotate Screw clockwise or anticlockwise. This will produce an even gap between doors and frame.
