Assembly Instructions				
Caution : You must read this before you proceed				
Care & Maintenance				
0	 Not for commercial use. For residential use only. 			
↓ ∰	 Furniture may scratch floors. We recommend using furniture pads to protect your floors. 			
0 5	 Do not put hot items directly on furniture surface. 			
	• Do not clean furniture with harsh cleansers or polish.			
ØÖ	 Do not place furniture under direct sunlight. 			
0	• Do not place furniture near heating or cooling vents.			
0 L	 Do not write on furniture without a padded barrier to protect the surface. 			
Ø O:	• Do not place furniture outside . For indoor use only.			
	 Stains may be removed with mild soap solution and damp cloth. 			
0 🏋	• Children should not climb or jump on the furniture.			
1	 Dust and pick-up spills using a clean, non-colored, lint-free cloth. 			

Chair					
Parts List					
Label	Picture	Description	QTY		
A		Seat	1		
В		Back with Legs	1		
С		Front Leg	2		

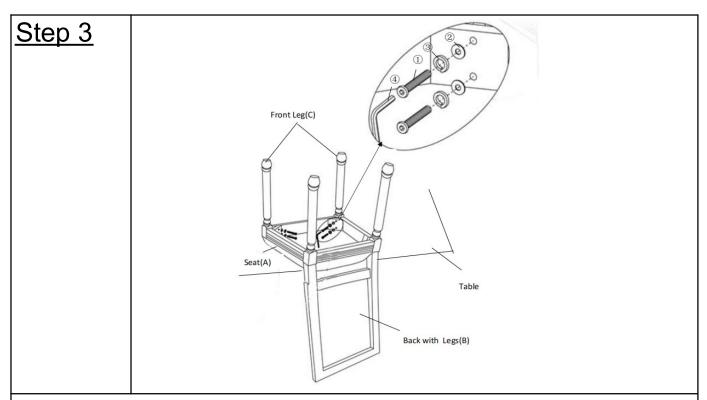

Align the mounting positions of the Seat(A) and Back with Legs(B), then attach them using Bolts(1), Spring Washers(2) and Washers(3) with Allen Key(4).

Friendly notice:

If the mounting positions cannot be aligned well which hinders the installation, then sway the Seat(A) lightly when locking the Bolts, this action could help prevent the Bolts from getting stuck and ensure smooth assembly.

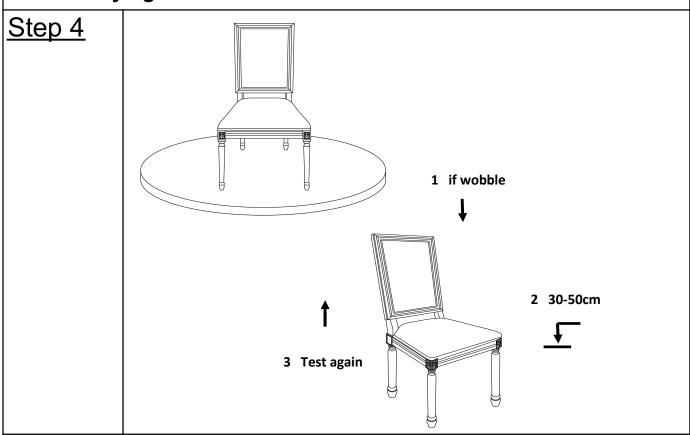

Do not fully tighten the Bolts.

Place the Seat(A) on the side of a table, with the Backrest facing down and perpendicular to the Desk Top, as pictured.

Insert Front Legs(C) into the mounting positions of Seat(A) and attach using Bolts(1), Spring Washers(2), and Washers(3) with Allen Key(4).

Do not fully tighten the Bolts.

Place the Chair on a level Surface to check if it wobbles.

If it is wobbles, lift the Chair some 30cm to 50cm high from the ground. Keep your feet and toes well away from the drop zone.

Drop the Chair freely and vertically, with all four legs hitting the ground at the same time.

This Drop Test will help to ensure that all the Parts, Bolts, and gaps reach full alignment status.

Test again for evenness on a Level Surface.

If no wobbles are found, proceed to tighten all the Bolts.

When tightening the Bolts, tighten sequentially.

Do not fully tighten any Bolt fully and then move on towards the next one.

This may cause the frame to warp.

If there are still wobbles, loosen the Bolts and execute this same drop test.
