Wreath

SHAPING

The product is shipped from the factory with the branch tips compressed to the center. Each branch tip must be shaped to its proper position to give the product a natural look. This will also bring the piece to its advertised dimension. The care and attention given to this final process will result in a genuinely beautiful and appealing holiday decoration. Shaping is done by gently grasping the branch tips and spreading them out away from the center.

Wreath

BEFORE

AFTER

STORAGE

Store product in a cool, dry location, protected from sunlight.

WARNINGS

- The product is for indoor only.
- This seasonal use product is not intended for permanent installation or use.
- This is not a toy. Keep out of reach of children. Product may produce small parts which could pose a choking hazard.
- Do not mount or place near gas or electric heaters, fireplaces, candles or other similar sources of heat. Keep away sources of heat and direct flame.
- Do not use this product for other than its intended use.
- Do not hang ornaments or other objects from cord, wire or light string.
- Do not attach to walls or furniture in close proximity to cots and children's beds.
- When not in use, store neatly in a cool, dry location protected from sunlight.

Care & Maintenance

- Wipe the branches clean with a soft cloth.
- If it is extra dirty or dull, use warm water and a few drops of dishwashing soap in a spray bottle.
- Spray stained areas of the tree and wipe with a soft cloth.
- Allow either kind of tree to dry thoroughly before decorating.
- Pack individual sections of the tree in plastic bags or old bedsheets to protect them from accumulating more dust and dirt in storage.
- Exposure to heat or humidity may cause its material to warp from its original shape.

Questions & Answers about Proposition 65

- What is Proposition 65?

Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. These chemicals can be in the products that Californians purchase, in their homes or workplaces, or that are released into the environment. By requiring that this information be provided, Proposition 65 enables Californians to make informed decisions about their exposures to these chemicals.

Proposition 65 also prohibits California businesses from knowingly discharging significant amounts of listed chemicals into sources of drinking water.

Proposition 65 requires California to publish a list of chemicals known to cause cancer, birth defects or other reproductive harm. This list, which must be updated at least once a year, has grown to include approximately 900 chemicals since it was first published in 1987.

- What types of chemicals are on the Proposition 65 list?

The list contains a wide range of naturally occurring and synthetic chemicals that include additives or ingredients in pesticides, common household products, food, drugs, dyes, or solvents. Listed chemicals may also be used in manufacturing and construction, or they may be byproducts of chemical processes, such as motor vehicle exhaust.

- What does a warning mean?

If a warning is placed on a product label or posted or distributed at a workplace, a business, or in rental housing, the business issuing the warning is aware or believes that it is exposing individuals to one or more listed chemicals.

By law, a warning must be given for listed chemicals unless the exposure is low enough to pose no significant risk of cancer or is significantly below levels observed to cause birth defects or other reproductive harm.

- Where can I get more information on Proposition 65?

If you have specific questions on the administration or implementation of Proposition 65, you can contact OEHHA's Proposition 65 program at P65.Questions@oehha.ca.gov, or by phone at (916) 445-6900.
